

# Profile Management

If you would like to view or update your profile information, click on the link with your name at the top right of your Quatrix account. It opens the form displaying your name and email, user class in Quatrix ([pro](#), [associate](#) or [jailed](#)), used and available storage and all Quatrix accounts with the active one on top.

By clicking on the **Manage Profile** link below the list of accounts you'll see two tabs: **General** and **Security**. The **General** tab allows you to update your personal information (name, language, email signature), except the email that can only be changed by your administrator or the account owner.

## Language Options

Quatrix is available in two languages: English and Chinese. Users can make language adjustments on the **General** tab (see the screenshot above) that will apply only to their interfaces. Being the user with administrator's permission allows you to adjust the language based on user preference (while [adding or editing the user](#)) or you can switch the language for the account (on the [Administration](#) tab).

Only the account owner can change the email for Quatrix account. With the change of the account email, the owner agrees to hand over all rights to the new owner of the email address.

The **Security** tab allows you to adjust the security settings: password, two-factor authentication and PGP keys. [Learn more.](#)

The screenshot shows the Quatrix user interface. At the top left is the Quatrix logo. At the top right, the user's name 'Jane Doe' is displayed with a dropdown arrow, and a 'Log out' button is next to it. Below the logo, there are two tabs: 'General' and 'Security', with 'Security' being the active tab. On the left side, there is a vertical navigation menu with icons and labels for 'Home', 'Share', 'Contacts', 'File Explorer', and 'Activity Log'. The main content area is divided into three sections: 'Authentication', 'Keys', and 'Two-factor authentication'. The 'Authentication' section has a 'Password' heading and a 'Change Password' button. The 'Two-factor authentication' section has an 'Activate' button. The 'Keys' section has a 'PGP Keys' heading and a 'Change Keys' button. Below the 'Change Keys' button, there is a 'Change Passphrase' button.
