

# requestPasswordReset

Initiates password reset process, if email is correct

## Parameters

Name	Type	Description
<b>email</b> required	string	email for reset process action
<b>cb</b> optional	function	callback function

## Example

```
this.requestPasswordReset = function(email, cb) {  
  return _request( {  
    method: 'POST',  
    url: '/user/request_password_reset',  
    data: {email: email},  
    callback: cb  
  });  
};
```
