

# filecmdCopy

Initiates copy action of selected files.

## Parameters

Name	Type	Description
<b>source</b> required	array	array with selected files
<b>target</b> required	string	specified folder id
<b>overwrite</b> required	integer	
<b>cb</b> optional	function	specified folder id

## Example

```
this.filecmdCopy = function(source, target, overwrite, cb) {  
  var data = {  
    ids: source,  
    target : target  
  };  
  
  if (typeof overwrite !== 'undefined') {  
    data.overwrite = overwrite;  
  }  
  
  return _request({  
    method: 'POST',  
    url: '/file/copy',  
    data: data,  
    callback: cb  
  });  
};
```
