

filecmdMove

Initiates remove action of specified items.

Parameters

Name	Type	Description
source required	array	array with ids of selected items
target required	string	id of selected folder
cb optional	function	callback function

Example

```
this.filecmdMove = function(source, target, cb) {  
  return _request({  
    method: 'POST',  
    url: '/file/move',  
    data: {  
      ids: source,  
      target: target  
    },  
    callback: cb  
  });  
};
```
