

requestPasswordReset

Initiates password reset process, if email is correct

Parameters

Name	Type	Description
email required	string	email for reset process action
cb optional	function	callback function

Example

```
this.requestPasswordReset = function(email, cb) {  
  return _request( {  
    method: 'POST',  
    url: '/user/request_password_reset',  
    data: {email: email},  
    callback: cb  
  });  
};
```
