

getUsersKeys

Returns public PGP keys of specified users or contacts.

Parameters

Name	Type	Description
user_ids required	array	array with user or contact id's
cb optional	function	callback function

Example

```
this.getUsersKeys = function(user_ids, cb) {  
  return _request({  
    method: 'POST',  
    url: '/key/users',  
    data: {ids: user_ids},  
    callback: cb  
  });  
};
```
