

readUserContact

Fetches contact of specified user.

Parameters

Name	Type	Description
cuuid required	string	user uuid
cb optional	function	callback function

Example Result

```
this.readUserContact = function(cuuid, cb) {  
  return _request({  
    method: 'GET',  
    url: 'user/contacts/' + cuuid,  
    callback: cb  
  });  
};
```
