

updateContact

Updates existing contact. Check "data" example below.

Parameters

Name	Type	Description
cuuid required	string	PGP key name.
data required	uuid	key owner user ID.
cb optional	string	public part of PGP key

Example

```
this.updateContact = function(cuuid, data, cb) {  
  return _request({  
    method: 'POST',  
    url: '/contact/edit/' + cuuid,  
    data: data,  
    callback: cb  
  });  
};
```

Example Result

```
{  
  email: 'hello@world.net',  
  name : 'mr. Smith'  
}
```
