

# getDownloadLink

Returns download links for specified files. Check "data" example below.

## Parameters

Name	Type	Description
<b>data</b> required	object	information about files that should be downloaded
<b>cb</b> optional	function	callback function

## Example

```
this.getDownloadLink = function(data, cb) {  
  return _request( {  
    method : 'POST',  
    url: '/file/downloadlink',  
    data: data,  
    callback: cb  
  });  
};
```

## Example Result

```
{  
  ids: [ "12345678-1234-1234-123456789098" ]  
}
```
