

# getUploadLink

Returns link for file upload.

## Parameters

Name	Type	Description
<b>data</b> required	object	file metadata
<b>cb</b> optional	function	callback function

## Example

```
this.getUploadLink = function(data, cb) {  
  return _request({  
    method: 'POST',  
    url: '/upload/getlink/',  
    data: data,  
    callback: cb  
  });  
};
```

## Example Result

```
{  
  name: "file.jpg",  
  parent: "12345678-1234-1234-123456789098", // parent folder id  
  upload_type: "multipart"  
}
```
