

ishareMetadata

Changes branding data for Quatrix. Check required "data" example.

Parameters

Name	Type	Description
user_id required	string	specified user id
cb optional	function	callback function

Example

```
this.ishareMetadata = function(user_id, cb) {  
  return _request({  
    method: 'GET',  
    url: '/user/ishare_metadata/'+user_id,  
    callback: cb  
  });  
};
```

Example Result

```
{  
  bcc: ['hidden@ninja.bcc'],  
  email_footer: "some default email footer",  
  name: "New Quatrix headin"  
}
```
