

keyRequestMetadata

Returns metadata for key_request page.

Parameters

Name	Type	Description
id required	string	key_request id
cb optional	function	callback function

Example

```
this.keyRequestMetadata = function(id, cb) {  
  return _request({  
    method: 'GET',  
    url: '/key_request/metadata/'+id,  
    callback: cb  
  });  
};
```
