# sendRequest

Sends generated request-files link to specified user. Check "data" example below.

## Parameters

| Name | Type | Description |
|---|---|---|
| id<br>required | string | specified user/contact id |
| data<br>optional | object | metadata for request-files page |
| cb<br>optional | function | callback function |

## Example

```
this.sendRequest = function (id, data, cb) {
  return _request({
    method : 'POST',
    url : '/contact/send_request/'+id,
    data: data,
    callback : cb
  });
};
```

## Example Result

```
{
 message: "some message"
}
```
