

createKey

Creates key for specified user. Check 'data' example below.

Parameters

Name	Type	Description
data required	object	information about key
cb optional	function	callback function

Example

```
this.createKey = function(data, cb) {  
  return _request({  
    method: 'POST',  
    url: '/key/create',  
    data: data,  
    callback: cb  
  });  
};
```

Example Result

```
{  
  name: 'newName',  
  user: '12345678-1234-1234-123456789098',  
  public: "", // base64 encoded public value  
  private: "" // base64 encoded private value  
}
```
